VENUE: PRIDEINN NYALI HOTEL, MOMBASA

COST: KSHS 92,500 EXCLUDING VAT PER PERSON

NITA REGISTERED: NITA/TRN/916

INTRODUCTION

Adopting HR Metrics and Analytics to improve HR decision making is the hottest topic for HR professionals today. Early adopters of HR analytics create a people advantage for their organizations. There are pioneer organizations that have implemented such data-driven approaches to make better people decisions which set themselves apart from their competitors. However, there are insufficient HR professionals who are able to perform this function effectively. This view is backed by a recent study which found that only three percent (3%) of HR practitioners can perform advanced multivariate analyses. It is the systematic collection, analysis, and interpretation of data designed to improve decisions about talent and the organization. The emergence of a data-driven HR function holds new opportunities for professionals and organizations who embrace them. Data-driven HR starts by defining and implementing the right HR metrics. Metrics help determine the efficiency and impact of the workforce and the HR department itself. This course equips participants to develop HR metrics, implement them and align them with to organizations' strategy. Participants will learn to determine which metrics are relevant to strategic business goals and how to implement those successfully. Because of the practical applicability of the course, delegates will be able to immediately apply newly acquired skills in their respective organizations.

HR metrics and analytics is analysis employed to make better decisions about all aspects of HR strategy with the aim of significantly scaling up business performance. It is both a strategic and operational concept that enables organizations to understand key aspects of workforce performance using data and evidence. It is a growing discipline that continues to gain considerable traction across the profession, but survey data has shown that the capability to conduct HR analytics remains low. Organisation which follow good practice should have up to date, clearly defined data which is robust and of high quality, and which is used in a consistent way by skilled experts able to complete analytics activity and communicate it to business and HR stakeholders in regular and accessible reports. This training course is designed to give participants the opportunity to explore the necessary thinking and approach to deal with the challenges of sustaining an evidence-based approach. For most HR professionals, the evidence-based approach represents a fundamental shift in their business roles, but it provides them with an opportunity to become strategic partners in business decision-making.

This course prepares participants to determine the HR metrics that align with their organisations' strategic objectives. This training expounds on the characteristics of high-quality data and equips delegates to find and collect that data, inside or outside their organizations. It provides a high-level introduction to common analysis techniques and some mistakes to avoid when interpreting data, or when assessing reports and interpretations offered by others. In the final section of the course, participants will learn to take the results of data collection and analysis and communicate the findings in a compelling manner so that change follows. HR Metrics are data based on historical performance and are useful in measuring progress, but they do little to help you make decisions that will change the future. On the contrary, HR Analytics is the use of data to explain why some workers are high performing, what truly motivates people to work harder, what training courses deliver the most value to the Organization and much more.

OVERALL WORKSHOP OBJECTIVE

The training aims at bringing together HR professionals and equip them with tools to drive organisational change around human capital activities by linking evidence-based data to business strategy and performance. The overall objective of this course is to empower HR professionals on how to apply HR metrics and analytics to a broad spectrum of human capital activities and linking them to workforce analytics. It involves use of practical equations and analysis of the context and how they assist business with supporting its strategies and ensure HR is perceived as a credible business partner and adding value overall. Our HR Metrics and Analytics workshop provides delegates with the tools and skills to identify the information they need, understand it and use it to make meaningful recommendations and decisions in their workplace.

SPECIFIC OBJECTIVES OF THIS TRAINING

After completing this five-day training, participants will be able to apply the concepts, theory and best practices in HR metrics and analytics. By the end of this training, participants should be able to:

- Describe the evolution of HR metrics and analytics
- Understand the HR's role in corporate strategy
- Support and design HR metrics and HR strategy maps for strategic outcomes Know the different types of metrics and understand their respective application and impact
- Determine which HR metrics are relevant in achieving organization's goals and which are not
- Be able to implement HR metrics within the organization
- Understand the connection between HR metrics and HR analytics
- Know how to compose an HR scorecard and benchmark your HR metrics
- Undertake problem analysis and decision-making
- Implement successful change management
- Use data for improved daily people management

Learn. Internalize. Apply

- Drive strategic change rather than react to it
- Utilize the HR Metrics and Workforce Analytics Model to link human capital results and activities to business performance
- Identify ways to benchmark performance and create standards
- Avoid the potential misuses of metrics

BENEFITS TO YOUR ORGANISATION

Training is an investment in the future of your organisation and employees in which the payback is immediate. Building skills and improving knowledge in HR metrics and analytics helps your company stay ahead of the pack and execute its mandate. There is this ancient *Chinese proverb that says: "Give a man a fish and you feed him for a day. Teach a man to catch fish and you feed him for a lifetime."* There is this anonymous quote that *"I believe that the data will set you free. At the end of the day, it is about how do you turn those pieces of information into insights that will improve business by Steven Rice – Juniper Networks."* This training is one of the building blocks for developing a solid culture of using HR analytics in a way that it impacts positively your organization with:

- A more proactive approach for Linking HR and business strategies
- Tools for assessing organizational readiness for analytics initiatives
- Ability to build the business case for HR analytics
- Ability to demonstrate the credibility and value added by HR
- The use analytical insights to improve talent management processes
- Development of the criteria for selecting between strategic and tactical analytics initiatives

- ✓ Department Managers
- ✓ Risk Managers
- ✓ Team Lead/Managers
- ✓ HR Supervisors
- ✓ workforce planning analysts

OUR TRAINING METHODOLOGY

At DGMB, we have spent a couple of years developing and refining our training approach in this area. Our methodology has several features that will ensure your staff experience a robust and relevant program; one that strengthens team dynamics and the organization deliver improved results. Some of the highlights of our unique approach are:

◆ **Reduced Emphasis on Formal Training**

We base our course designs on the 70:20:10 paradigms. Research indicates that about 70% of what adults learn is through on-the-job experience, 20% through social learning, and 10% through formal training. We present information in ways that engage participants and generate plenty of

Page | 4

discussion and sharing of experiences. We also provide individual and group assignments that encourage participants to integrate new concepts into their daily work.

◆ **Practical and Relevant Content**

In assessing and designing customer service and communications skills course, we remembered Hermann Ebbinghaus' famous 'forgetting curve' that shows we forget 50% of learned material within one hour unless it is put into practice. Our needs analysis and instructional design practices produce engaging, real-world learning materials, customized so that participants relate fully with the content.

◆ **Employing the Wisdom of Renowned Management Thinkers**

We employ the wisdom of renowned academics and authors on business and management like Henry Mintzberg who believes that:

- ✓ Management should emphasize teamwork, rather than rely on heroic individualism
- ✓ Effective staff are reflective in the context of taking action
- ✓ Management development works best as social learning in small groups

◆ **Research-supported Methods**

Our training delivery is always informed by research on adult learning principles and by our experience as organizational development consultants, instructional designers and facilitators. Consequently, we include plenty of opportunities for learners to apply key concepts, using scenarios and simulations, personal action plans, accountability partners, and other techniques. These methods ensure participants retain what they have learned, apply what they have learned quickly, refine their approach, and internalize learning for long-term use.

◆ **Uncommon Focus**

Few training firms follow good design principles consistently because it takes time, sustained focus and clarity. Compared to other strategies and methodologies, DGMB Training Solutions will:

- ✓ Help you build strong internal communities
- ✓ Help staff learn more rapidly
- ✓ Build in lasting change through reflection
- ✓ Create working teams that are more cohesive, resilient, and productive

In this we have combined the following training approaches:

- i. Presentations through lecturing, group exercises, demonstrations and group discussions including presentations to enable interactions between the facilitators and the participants and among participants.
- ii. Discussions on topical issues arising from the various sessions and during the scheduled plenary discussions.
- iii. Citation of real case scenarios to enhance understanding of the core concepts, issues and training strategies
- iv. Role play, games and hands-on exercises
- v. Held plenary sessions to identify way forward

DGMB has deployed modern training aids aimed at making the training more exciting, inspiring and interesting. The teaching aids are numerous and serve different purposes. We used the following teaching aids to be very effective in capturing the imagination of the trainees:

- ✓ Overhead Transparencies (Colored power point slides), Demonstrations and emailed training materials to each participant.

COURSE DURATION

The course duration is **five (5) days** that will run as per our proposed course content below. The length of the training is adequate to cover the entire course.
